- Dekoratif Havalanırma / Decorative HVAC

UNDO OPENCELL SYSTEM

T15 open cell ceiling systems; is an open ceiling system that consists of U type panels which has 15mm base and 40mm height. The cells can be different models of square and rectangular type in order to give the architects and customer limitless space for design.

Panels can be used with T15 carrier systems which also offers a trackless system in which you cannot spot the carrier due to its same colors. Sepa Open cell systems can be produced perforated with acoustic fleece to fulfill various acoustic needs.

Undo Ceiling T15 open cell ceiling systems can be manufactured as single panels demounted which would be economical for transport or 600x600mm mounted panels in order to minimize the labor and installation time at the site.
